## PREFACE

This bibliography is a continuation of the "Bibliography of Military Psychiatry 1947-1952", prepared by the U.S. Armed Forces Medical Library, Reference Division, dated February 1953. Since the earlier list gave only part coverage to 1952 literature the present list includes 1952 references not previously listed. In a few cases references prior to 1952 have been listed in the present bibliography when these were found to have been omitted from the 1947-1952 list.

Finally the present list does not give complete coverage of the 1955 literature, although in some cases all 1955 issues of a given journal have been covered.

## PREFACE

This bibliography is a continuation of the "Bibliography of 1911-1914" prepared by the U.S. Armed Forces Medical Library, Reference Division, dated February 1953. Since the earlier list gave only past coverage to 1952 literature the present list includes 1953 references not previously listed. In a few cases references prior to 1952 have been listed in the present bibliography when there were found to have been omissions from the 1911-1952 list. Finally the present list does not give complete coverage of the 1953 literature, although in some cases all 1953 issues of a given journal have been covered.
